- 2' x 8'
- 1' x 4'

MANHOLE REPAIRS

CRACKED SURFACES

UNION REPAIRS

STAMPED PATH

THERMOPLASTIC LOGOS

The asphalt reheat systems currently offers four main sizes of portable units. The current line of portable heaters are in a class of there own, with regards to mobility and performance. These light weight heaters can be easily disassembled and transported to anywhere heat is needed. These portable units use a radiant blue-flame type of heat to warm the asphalt's surface, and are superior to the standard infrared heaters. This technology was developed to specifically help eliminate the risk of overheating, save on fuel costs and heat the surface faster.
